

Sujin K

Full-Stack Product Engineer · consumer health software, web, mobile, and the backend behind them

lksujins@gmail.com · sujin.tech · github.com/sujink1999 · linkedin.com/in/sujink · Chennai, India (remote, US hours)

The easier way to review this: [sujin.tech/atria](#), a page mapping Atria's JD to the work below, with live demos.

I build consumer health software because it fixed my own life: after eight years of health issues, tracking everything is what worked, so I co-founded Vanta and built it end to end. Before that: a YC startup's app built solo to 10M+ downloads, and DeFi frontends grown to \$10M TVL. TypeScript across the stack, 6+ years.

EXPERIENCE · 6+ years

Co-founder · Vanta

Sep 2025 – Present

Next.js · React 19 · Express 5 · React Native (Expo) · TypeScript · PostgreSQL / Drizzle

- Co-founded Vanta, a health/performance platform, and built the product end-to-end: data model, Express APIs, dashboards, and the App Store release.
- Built the wearable-data reconciliation engine merging Garmin and WHOOP streams into one record a member can trust: duplicates, conflicts, and gaps resolved in production.
- Built biomarker dashboards and lab-test infrastructure: blood-test booking, PDF lab report and DEXA report viewers, and an LLM daily-plan engine that reads months of one person's health history, shipped behind an eval harness.
- Shipped the Society community app to the App Store (Expo/React Native, custom Skia graphics, streaks and challenges) and the supporting web platform: e-commerce store, admin dashboards, Shopify embedded app.

Senior Founding Engineer · Beans

Jul 2025 – Sep 2025

Next.js · Node.js · Bull / Redis · AWS Lambda · Rust / Anchor

- Built a Solana token-launch platform whose worker pipeline executed launches, trades, and withdrawals unattended, moving more than \$100k an hour: idempotent jobs, distributed locks, automatic refunds on failure.
- Wrote the on-chain Anchor (Rust) program with simulation tests, and an event pipeline decoding on-chain events in Lambda through SQS into MySQL.

Founding Engineer · Caddi

Jul 2024 – Jun 2025

Browser extensions · AWS Lambda · Next.js

- Built a Chrome extension for swapping and bridging from any website, with a route checker comparing quotes across 19+ liquidity sources and flagging better routes.
- Ran it on serverless AWS Lambda microservices; early builder on Farcaster Frames.

Senior Web3 Engineer · 0vix / Gogo Protocol

May 2022 – Jun 2024

React · TypeScript · Cypress · i18n · multi-chain

- Built and led frontend development of the GOGOcoin and 0vix protocols, including UI/UX; primary author of the margin-trading and lending dApps, where a misrendered number is someone's money.
- Helped grow protocol TVL from \$500K to \$10M by introducing pre-mining rewards; shipped fully internationalized, Cypress-tested frontends.

Software Engineer · Mudrex (YC W19)

Sep 2021 – May 2022

Built the Mudrex mobile app from scratch in React Native, now 10M+ downloads; pre-seed through Series A.

Founding Engineer · Swix DAO

Mar 2022 – Jun 2022

Built the MVP of a crypto-native Airbnb using React, Node.js, and Web3.js.

Software Engineer 1 · Futuryze Digital Venture Studio

Feb 2021 – Oct 2021

Backend (Node.js) and UI (React) for the Fireside app; shipped iOS/Android apps with Flutter.

SKILLS

Frontend: TypeScript · React / Next.js · Tailwind · Framer Motion · Three.js / WebGL · browser extensions

Mobile: React Native (Expo) · Skia · Flutter

Backend: Node.js / Express · PostgreSQL / MySQL · Drizzle · Redis / Bull · GraphQL · AWS Lambda · Vercel

Health data: wearable APIs (Garmin, WHOOP, Strava) · reconciliation pipelines · LLM pipelines with eval harnesses · PDF report rendering

Design & tools: Figma · Shopify (Polaris / App Bridge) · Cypress / Jest · Sentry

EDUCATION

B.E. Computer Science, SSN College of Engineering, Chennai (2017 – 2021)
