

Sujin K

Full-Stack Engineer: backend, frontend, integrations, and production AI agents end to end

lksujins@gmail.com · sujin.tech · github.com/sujink1999 · linkedin.com/in/sujink · Chennai, India (remote, US hours)

The easier way to review this: sujin.tech/broccoli, a 2 minute page mapping your JD to live demos of everything below.

I ship 0-to-1 and own product areas end to end: problem definition, architecture, production. Built a YC startup's app solo to 10M+ downloads, then co-founded a health platform where I built everything from the Express backend and data model to a production LLM agent behind an eval harness, plus the integrations around it (Shopify, Garmin/WHOOP, Auth0). I run agents daily in my own workflows and want to build ones that do real work.

EXPERIENCE · 5+ years

Co-founder · Vanta

Sep 2025 – Present

Node.js · TypeScript · Express · Drizzle / PostgreSQL · Next.js · React Native (Expo)

- Co-founded Vanta, a health/performance platform, and built it end-to-end as the sole engineer: Express APIs, data model, and a wearable-data reconciliation engine (Garmin/WHOOP) shipped through 39 phased rollouts.
- Built the coach agent that plans each user's day: LLM pipeline with an eval harness scoring outputs before they ship. Not a demo, a feature users depend on daily.
- Worked directly with users and turned their workflows into shipped product: biomarker dashboards, PDF lab-report ingestion, e-commerce store, admin dashboards, a Shopify embedded app, and the Society community app on the App Store.

Senior Founding Engineer · Beans

Jul 2025 – Sep 2025

Rust / Anchor · Next.js · Redis · BullMQ

- Wrote the on-chain Anchor (Rust) program for a Solana token-launch platform: launches, betting, staking, NFT claims, with simulation tests and custom bonding-curve math securing real money.
- Built the launch pipeline behind it: Telegram bots and analytics dashboards backed by BullMQ/Redis worker queues, with retries, backups, and test coverage.
- Shipped the frontend as a retro desktop OS: live launches as draggable windows, physics-driven UI.

Founding Engineer · Caddi

Jul 2024 – Jun 2025

AWS Lambda · Browser extensions · Next.js

- Built a Chrome extension that lets users swap and bridge from any website, with an aggregator that inspects the swap and flags a better route when one exists.
- Ran it on serverless AWS Lambda microservices; early builder on Farcaster Frames (early 2024).

Senior Web3 Engineer · Ovox / Gogo Protocol

May 2022 – Jun 2024

React · TypeScript · Cypress · i18n · multi-chain

- Built and led frontend development of the GOGOcoin (on-chain asset manager) and Ovox (money market) protocols, including UI/UX design; primary author of the margin-trading and lending dApps.
- Helped grow protocol TVL from \$500K to \$10M by introducing pre-mining rewards.

Founding Engineer · Swix DAO

Mar 2022 – Jun 2022

Built the MVP of a crypto-native Airbnb using React, Node.js, and Web3.js.

Software Engineer · Mudrex (YC W19)

Sep 2021 – May 2022

Built the Mudrex mobile app from scratch in React Native, now 10M+ downloads; pre-seed through Series A.

Software Engineer 1 · Futuryze Digital Venture Studio

Feb 2021 – Oct 2021

Backend (Node.js) and UI (React) for the Fireside app; shipped iOS/Android apps with Flutter.

SELECTED PROJECTS

FincorpX (2024): document-AI expense backend. OCR on receipts (Azure Form Recognizer, Veryfi), rules engine, Python ML transaction classifiers.

SKILLS

Backend: Node.js / Express · TypeScript · PostgreSQL / MySQL · Drizzle · Redis / BullMQ · GraphQL · AWS Lambda · Vercel · Firebase

AI: LLM pipelines · agent workflows · eval harnesses · Claude / OpenAI APIs

Integrations: Shopify · Auth0 · Garmin / WHOOP wearable APIs · Telegram bots · payment / KYC flows

Frontend: React / Next.js · Vue · Tailwind · Framer Motion · Three.js / WebGL · browser extensions

Mobile: React Native (Expo) · Skia · Flutter

Systems: Rust · Cypress / Jest

EDUCATION

B.E. Computer Science, SSN College of Engineering, Chennai (2017 – 2021)
