

Sujin K

Full-Stack Engineer: Next.js and Node backends end to end, with production LLM agents and hand-built agent memory

lksujins@gmail.com · sujin.tech · github.com/sujink1999 · linkedin.com/in/sujink · Chennai, India (remote, US hours)

The easier way to review this: [sujin.tech/mem0](#), a 2 minute page mapping your JD to live demos of everything below.

I ship end to end: APIs, data models, UIs, and production deploys. At Vanta, the health platform I co-founded, I hit Mem0's exact problem, an agent that has to remember months of a person's health, and built ChatGPT-style memory by hand: durable facts with supersession, weekly rollups, cache-stable snapshots. Before that I built a YC startup's app solo to 10M+ downloads. I run agents daily in my own workflows.

EXPERIENCE · 5+ years

Co-founder · Vanta

Sep 2025 – Present

Next.js · React · TypeScript · Express · Drizzle / PostgreSQL · LLM pipelines · React Native (Expo)

- Hand-built agent memory for a health chat agent: fact extraction after each reply, durable fact rows with supersession and expiry, weekly rollups, and per-chat snapshots assembled once at chat start so the prompt prefix stays cache-stable.
- Built the coach agent that plans each user's day: LLM pipeline with an eval harness scoring outputs before they ship. Shipped through 39 logged phased rollouts.
- Sole engineer for the whole product: Express APIs, data model, wearable-data reconciliation engine (Garmin/WHOOP), biomarker dashboards, PDF lab-report ingestion, Shopify embedded app, and the Society community app on the App Store.

Senior Founding Engineer · Beans

Jul 2025 – Sep 2025

Next.js · BullMQ · Redis · Rust / Anchor · Jest

- Built a token-launch pipeline that ran unattended in production: BullMQ/Redis worker queues with retries, backups, and test coverage, feeding Telegram bots and analytics dashboards.
- Wrote the on-chain Anchor (Rust) program securing real money: launches, betting, staking, NFT claims, with simulation tests and custom bonding-curve math.
- Shipped the frontend as a retro desktop OS: live launches as draggable windows, physics-driven UI.

Founding Engineer · Caddi

Jul 2024 – Jun 2025

AWS Lambda · Browser extensions · Next.js

- Built a Chrome extension that lets users swap and bridge from any website, with an aggregator that inspects the swap and flags a better route when one exists.
- Ran it on serverless AWS Lambda microservices; early builder on Farcaster Frames (early 2024).

Senior Web3 Engineer · 0vix / Gogo Protocol

May 2022 – Jun 2024

React · TypeScript · Cypress · i18n · multi-chain

- Built and led frontend development of the 0vix money market (protocol TVL grew \$500K to \$10M) and GOGOcoin asset manager; primary author of the margin-trading and lending dApps, where a shipped bug loses real money.
- Kept the lending frontend e2e tested with Cypress across chains and locales.

Founding Engineer · Swix DAO

Mar 2022 – Jun 2022

Built the MVP of a crypto-native Airbnb using React, Node.js, and Web3.js.

Software Engineer · Mudrex (YC W19)

Sep 2021 – May 2022

Built the Mudrex mobile app from scratch in React Native, now 10M+ downloads; pre-seed through Series A.

Software Engineer 1 · Futuryze Digital Venture Studio

Feb 2021 – Oct 2021

Backend (Node.js) and UI (React) for the Fireside app; shipped iOS/Android apps with Flutter.

SELECTED PROJECTS

FincorpX (2024): document-AI expense backend. OCR on receipts (Azure Form Recognizer, Veryfi), rules engine, Python ML transaction classifiers.

SKILLS

AI: agent memory (facts, rollups, snapshots) · LLM pipelines · eval harnesses · Claude / OpenAI APIs

Backend: Node.js / Express · TypeScript · PostgreSQL / MySQL · Drizzle · Redis · BullMQ · REST APIs · GraphQL · AWS Lambda · Vercel

Frontend: React / Next.js · Tailwind · Framer Motion · Three.js / WebGL · browser extensions

Mobile: React Native (Expo) · Skia · Flutter

Quality: Cypress / Jest · phased rollouts · production logging and monitoring

EDUCATION

B.E. Computer Science, SSN College of Engineering, Chennai (2017 – 2021)
