

Sujin K

Consumer Product Engineer · zero-to-one products, owned end-to-end from conception to launch

lksujins@gmail.com · sujin.tech · github.com/sujink1999 · linkedin.com/in/sujink

The easier way to review this: [sujin.tech/albert](#), a page mapping Albert's posting to the work below, with live demos.

6+ years building consumer products zero-to-one: Mudrex's app built solo in React Native to 10M+ downloads, and Vanta, a health platform I co-founded and shipped end-to-end from conception to launch: React dashboards, an App Store app, Postgres behind everything, and an AI coach with Claude running my product pipelines and my daily workflow.

EXPERIENCE · 6+ years

Co-founder · Vanta

Sep 2025 – Present

Next.js · React 19 · Express 5 · React Native (Expo) · TypeScript · PostgreSQL / Drizzle

- Co-founded Vanta, a health/performance platform, and built the product end-to-end: data model, Express APIs, dashboards, and the App Store release.
- Built the core product, an AI health coach: an agentic tool-calling chat agent with durable memory over months of one person's health history (18+ tools, contradiction-resolving fact store, propose-and-confirm governance for plan changes), shipped behind an eval harness of ~30 end-to-end scenarios with anti-hallucination regression tests.
- Built the wearable-data reconciliation engine merging Garmin and WHOOP streams into one record a member can trust: duplicates, conflicts, and gaps resolved in production, ambiguous matches settled by a constrained LLM tiebreak.
- Built biomarker dashboards and lab-test infrastructure: blood-test booking, PDF lab report and DEXA report viewers, and the daily-plan pipeline that adjusts to recovery signals.
- Shipped the Society community app to the App Store (Expo/React Native, custom Skia graphics, streaks and challenges) and the supporting web platform: e-commerce store, admin dashboards, Shopify embedded app.

Senior Founding Engineer · Beans

Jul 2025 – Sep 2025

Next.js · Node.js · Bull / Redis · AWS Lambda · Rust / Anchor

- Built a Solana launchpad and trading platform whose worker pipeline executed launches, trades, and withdrawals unattended, handling \$100k of trades an hour: idempotent jobs, distributed locks, automatic refunds on failure.
- Wrote the on-chain Anchor (Rust) program with simulation tests, and an event pipeline decoding on-chain events in Lambda through SQS into MySQL.

Founding Engineer · Caddi

Jul 2024 – Jun 2025

Browser extensions · AWS Lambda · Next.js

- Built a Chrome extension for swapping and bridging from any website, with a route checker comparing quotes across 19+ liquidity sources and flagging better routes.
- Ran it on serverless AWS Lambda microservices; early builder on Farcaster Frames.

Senior Web3 Engineer · Ovox / Gogo Protocol

May 2022 – Jun 2024

React · TypeScript · Cypress · i18n · multi-chain

- Built and led frontend development of the GOGOCoin and Ovox protocols, including UI/UX; primary author of the margin-trading and lending dApps, where a misrendered number is someone's money.
- Helped grow protocol TVL from \$500K to \$10M by introducing pre-mining rewards; shipped fully internationalized, Cypress-tested frontends.

Software Engineer · Mudrex (YC W19)

Sep 2021 – May 2022

Built the Mudrex mobile app from scratch in React Native, now 10M+ downloads; pre-seed through Series A.

Founding Engineer · Swix DAO

Mar 2022 – Jun 2022

Built the MVP of a crypto-native Airbnb using React, Node.js, and Web3.js.

Software Engineer 1 · Futuryze Digital Venture Studio

Feb 2021 – Oct 2021

Backend (Node.js) and UI (React) for the Fireside app; shipped iOS/Android apps with Flutter.

SKILLS

Frontend: React.js / Next.js · TypeScript · Tailwind · Framer Motion · Three.js / WebGL

Mobile: React Native (Expo) · Skia · App Store releases · Flutter

Backend: Node.js / Express · Postgres / MySQL · Drizzle · Redis / Bull · AWS Lambda · Vercel

AI: Claude (product pipelines + agentic dev workflow) · tool-calling agents · LLM pipelines with eval harnesses

Health data: wearable APIs (Garmin, WHOOP, Strava) · reconciliation pipelines · PDF report rendering

Design & tools: Figma · Shopify (Polaris / App Bridge) · Cypress / Jest · Sentry

EDUCATION

B.E. Computer Science, SSN College of Engineering, Chennai (2017 – 2021)
