

Sujin K

Full Stack Software Engineer · React / TypeScript frontends, backend services, APIs, and data layers, owned end-to-end

lksujins@gmail.com · sujin.tech · github.com/sujink1999 · linkedin.com/in/sujink

The easier way to review this: [sujin.tech/seeq](#), a page mapping Seeq's JD to the work below, with live demos.

6+ years of full stack software engineering, owning features end-to-end from React and TypeScript frontends to backend services, APIs, and data layers: a lending dApp grown from \$500k to \$10M TVL, Mudrex's app built solo to 10M+ downloads, and Vanta, a health analytics platform I co-founded and built end to end, with LLM features in production behind an eval harness.

EXPERIENCE · 6+ years

Co-founder · Vanta

Sep 2025 – Present

Next.js · React 19 · TypeScript · Tailwind · Express 5 · PostgreSQL / Drizzle · React Native (Expo)

- Co-founded Vanta, a health/performance platform, and built the product end-to-end: data model, Express APIs, PostgreSQL data layer, dashboards, and the App Store release.
- Built the core product, an AI health coach: an agentic tool-calling chat agent with durable memory over months of one person's health history (18+ tools, contradiction-resolving fact store, propose-and-confirm governance for plan changes), shipped behind an eval harness of ~30 end-to-end scenarios with anti-hallucination regression tests.
- Built the wearable-data reconciliation engine merging Garmin and WHOOP sensor streams into one record a member can trust: duplicates, conflicts, and gaps resolved in production, ambiguous matches settled by a constrained LLM tiebreak.
- Built biomarker analytics dashboards and lab-test infrastructure: blood-test booking, PDF lab report and DEXA report viewers, and the daily-plan pipeline that adjusts to recovery signals.
- Shipped the Society community app to the App Store (Expo/React Native, custom Skia graphics) and the supporting web platform: e-commerce store, admin dashboards, Shopify embedded app.

Senior Founding Engineer · Beans

Jul 2025 – Sep 2025

Next.js · Node.js · GraphQL (Apollo) · Bull / Redis · AWS Lambda · Rust / Anchor

- Built a Solana launchpad and trading platform whose worker pipeline executed launches, trades, and withdrawals unattended, handling \$100k of trades an hour: idempotent jobs, distributed locks, automatic refunds on failure.
- Wrote the on-chain Anchor (Rust) program with simulation tests, and an event pipeline decoding on-chain events in Lambda through SQS into MySQL; live trading charts over Apollo GraphQL.

Founding Engineer · Caddi

Jul 2024 – Jun 2025

Browser extensions · React · AWS Lambda · NestJS · MySQL

- Built a Chrome extension for swapping and bridging from any website, with a route checker comparing quotes across 19+ liquidity sources and flagging better routes.
- Built the cross-chain bridge aggregator API (NestJS, MySQL, Redis/Bull) across 15 mainnets, deployed on AWS.

Senior Web3 Engineer · 0vix / Gogo Protocol

May 2022 – Jun 2024

React · TypeScript · Cypress · i18n · multi-chain

- Built and led frontend development of the GOGOCoin and 0vix protocols, including UI/UX; primary author of the margin-trading and lending dApps, real-time analytics over live on-chain data where a misrendered number is someone's money.
- Helped grow protocol TVL from \$500K to \$10M by introducing pre-mining rewards; shipped fully internationalized, Cypress-tested frontends.

Software Engineer · Mudrex (YC W19)

Sep 2021 – May 2022

Built the Mudrex mobile app from scratch in React Native, now 10M+ downloads; pre-seed through Series A.

Founding Engineer · Swix DAO

Mar 2022 – Jun 2022

Built the MVP of a crypto-native Airbnb using React, Node.js, and Web3.js.

Software Engineer 1 · Futuryze Digital Venture Studio

Feb 2021 – Oct 2021

Backend (Node.js) and UI (React) for the Fireside app; shipped iOS/Android apps with Flutter.

SKILLS

Frontend: React · TypeScript · Next.js · modern frontend tooling (Tailwind, Turbopack, Vite) · Redux · reusable component architecture

Backend: Node.js / Express · NestJS · GraphQL · Python (FastAPI) · Rust (Anchor) · AWS Lambda · Redis / Bull

Data layers: PostgreSQL · MySQL · Drizzle ORM · Prisma · MongoDB · event pipelines (SQS)

Mobile: React Native (Expo) · Skia · Flutter

Testing: Cypress e2e · Jest · simulation tests · LLM eval harnesses

Design & tools: Figma · Sentry · Shopify (Polaris / App Bridge)

EDUCATION

B.E. Computer Science, SSN College of Engineering, Chennai (2017 – 2021)
