

Sujin K

Frontend Engineer · TypeScript, React, and the checks that let AI agents ship safely

lksujins@gmail.com · sujin.tech · github.com/sujink1999 · linkedin.com/in/sujink · Bali, Indonesia (remote, async)

The easier way to review this: sujin.tech/supabase, a page mapping Supabase's JD to the work below, with live demos.

I take products 0→1 and then earn the next version from users: Mudrex built solo to 10M+ downloads, DeFi dashboards trusted with \$10M, and Vanta, the health platform I co-founded and built end to end. TypeScript and React across the stack for 6+ years, with AI coding agents writing a large share of the code and layered checks deciding what lands.

EXPERIENCE · 6+ years

Co-founder · Vanta

Sep 2025 – Present

Next.js (App Router, server components, SSR) · React 19 · TypeScript · Express 5 · React Native (Expo) · PostgreSQL / Drizzle

- Co-founded Vanta, a health/performance platform, and took it 0→1 end to end: data model, Express APIs, dashboards, and the App Store release, iterating from real user feedback rather than a handed-down spec.
- Ship with AI coding agents daily: agents write a large share of the code, and an eval harness of ~30 end-to-end scenarios with anti-hallucination regression tests decides what reaches users; when a bug slips through, the check that would have caught it gets added so the same regression can't happen twice.
- Built the core product, an AI health coach: a tool-calling chat agent with durable memory over months of one person's health history (18+ tools, contradiction-resolving fact store, propose-and-confirm governance for plan changes).
- Built biomarker dashboards and lab-test infrastructure: blood-test booking, PDF lab report and DEXA viewers, and the wearable reconciliation engine merging Garmin and WHOOP into one record a member can trust.
- Shipped the Society community app to the App Store (Expo/React Native, custom Skia graphics, streaks and challenges) and the supporting web platform: e-commerce store, admin dashboards, Shopify embedded app.

Senior Founding Engineer · Beans

Jul 2025 – Sep 2025

Next.js · Node.js · Bull / Redis · AWS Lambda · Rust / Anchor

- Built a Solana launchpad and trading platform as a retro desktop OS in Next.js; its worker pipeline executed launches, trades, and withdrawals unattended at \$100k+ an hour: idempotent jobs, distributed locks, automatic refunds on failure.
- Wrote the on-chain Anchor (Rust) program with simulation tests, and an event pipeline decoding on-chain events in Lambda through SQS into MySQL.

Founding Engineer · Caddi

Jul 2024 – Jun 2025

Browser extensions · AWS Lambda · Next.js

- Built a Chrome extension for swapping and bridging from any website, with a route checker comparing quotes across 19+ liquidity sources and flagging better routes.
- Ran it on serverless AWS Lambda microservices; early builder on Farcaster Frames.

Senior Web3 Engineer · OviX / Gogo Protocol

May 2022 – Jun 2024

React · TypeScript · Cypress · i18n · multi-chain

- Built and led frontend development of the GOGOcoin and OviX protocols; primary author of the margin-trading and lending dApps, where a misrendered number is someone's money, so every release ran through Cypress end-to-end suites.
- Helped grow protocol TVL from \$500K to \$10M by introducing pre-mining rewards; shipped fully internationalized, Cypress-tested frontends. Worked fully remote and async with a distributed team.

Software Engineer · Mudrex (YC W19)

Sep 2021 – May 2022

Built the Mudrex mobile app from scratch in React Native, now 10M+ downloads; pre-seed through Series A, iterated 0→1 from live user feedback.

Founding Engineer · Swix DAO

Mar 2022 – Jun 2022

Built the MVP of a crypto-native Airbnb using React, Node.js, and Web3.js.

Software Engineer 1 · Futuryze Digital Venture Studio

Feb 2021 – Oct 2021

Backend (Node.js) and UI (React) for the Fireside app; shipped iOS/Android apps with Flutter.

SKILLS

Frontend: TypeScript · React / Next.js (SSR, streaming, server components, edge) · Tailwind · Framer Motion · Three.js / WebGL · browser extensions

Quality & tooling: type safety at the boundaries · Cypress / Jest end-to-end and component tests · LLM eval harnesses with regression gates · CI pipelines · AI coding agents with guardrails

Backend: Node.js / Express · PostgreSQL / MySQL · Supabase · Drizzle · Redis · Bull · GraphQL · AWS Lambda · Vercel

Mobile: React Native (Expo) · Skia · Flutter

Design & tools: Figma · Shopify (Polaris / App Bridge) · Sentry

EDUCATION

B.E. Computer Science, SSN College of Engineering, Chennai (2017 – 2021)
