

Sujin K

Full-Stack Engineer for web, mobile, and the backend behind them

lksujins@gmail.com · sujin.tech · github.com/sujink1999 · linkedin.com/in/sujink · Chennai, India (remote, US hours)

The easier way to review this: [sujin.tech](#), with live demos and screen recordings of everything below.

I ship 0-to-1 and move fastest when the product doesn't exist yet. Co-founded a health platform, built a YC startup's app to 10M+ downloads, and took DeFi products to \$10M TVL, across web, mobile, and backend.

EXPERIENCE · 6+ years

Co-founder · Vanta

Sep 2025 – Present

Next.js · React Native (Expo) · Node.js · TypeScript · Drizzle

- Co-founded Vanta, a health/performance platform, and built the product end-to-end: biomarker dashboards, wearable-data reconciliation (Garmin/WHOOP), and an LLM daily-plan engine with an eval harness.
- Shipped the Society community app to the App Store: Expo/React Native, custom Skia graphics, streaks and challenges.
- Built the supporting multi-app web platform: e-commerce store, lab-test booking with PDF report rendering, admin dashboards, and a Shopify embedded app.

Senior Founding Engineer · Beans

Jul 2025 – Sep 2025

Next.js · Rust / Anchor · matter-js · Raydium

- Built a Solana token-launch platform rendered as a retro desktop OS: live launches as draggable windows, physics-driven UI, and custom bonding-curve math.
- Wrote the on-chain Anchor (Rust) program (launches, betting, staking, NFT claims) with bankrun simulation tests; Pump.fun launches with Raydium LP migration.
- Shipped Telegram launch bots and analytics dashboards backed by Redis worker queues.

Founding Engineer · Caddi

Jul 2024 – Jun 2025

Browser extensions · AWS Lambda · Next.js

- Built a Chrome extension that lets users swap and bridge from any website, with an aggregator that inspects the swap and flags a better route when one exists.
- Ran it on serverless AWS Lambda microservices; early builder on Farcaster Frames (early 2024).

Senior Web3 Engineer · Ovix / Gogo Protocol

May 2022 – Jun 2024

React · TypeScript · Cypress · i18n · multi-chain

- Built and led frontend development of the GOGOcoin (on-chain asset manager) and Ovix (money market) protocols, including UI/UX design; primary author of the margin-trading and lending dApps.
- Helped grow protocol TVL from \$500K to \$10M by introducing pre-mining rewards.

Founding Engineer · Swix DAO

Mar 2022 – Jun 2022

Built the MVP of a crypto-native Airbnb using React, Node.js, and Web3.js.

Software Engineer · Mudrex (YC W19)

Sep 2021 – May 2022

Built the Mudrex mobile app from scratch in React Native, now 10M+ downloads; pre-seed through Series A.

Software Engineer 1 · Futuryze Digital Venture Studio

Feb 2021 – Oct 2021

Backend (Node.js) and UI (React) for the Fireside app; shipped iOS/Android apps with Flutter.

SKILLS

Frontend: TypeScript · React / Next.js · Vue · Tailwind · Framer Motion · Three.js / WebGL · GSAP · browser extensions

Mobile: React Native (Expo) · Skia · Flutter

Backend: Node.js / Express · PostgreSQL / MySQL · Drizzle · Redis · GraphQL · Firebase · AWS Lambda · Vercel

Web3: Rust / Anchor · Solana · Web3.js / Ethers · wallet integrations

Design & tools: Figma · Shopify (Polaris / App Bridge) · Cypress / Jest

EDUCATION

B.E. Computer Science, SSN College of Engineering, Chennai (2017 – 2021)
